SUMMARY

Unity developer with 5+ years of professional experience shipping mobile, web and PC games, currently building gameplay features for a live-service mobile puzzle game. Turns design specs into working systems and Figma designs into UI, wiring both to remote config so events, offers, and rewards can change without an app update. Experienced in working with overseas teams across time zones; previously served as the team's point of contact for clients.

TECHNICAL SKILLS

Languages: C#, JavaScript/TypeScript

Unity: Unity 6 (2D/3D), uGUI (responsive layouts, safe areas), Animator, DOTween, TextMeshPro, Input System, ScriptableObjects, Editor scripting

Architecture: Event-driven architecture, dependency injection, JSON save systems, REST API integration

Platforms: Android, PC (Steam), Web

Live-Ops: Remote config, feature flags and A/B tests (Amplitude), rewarded ads (AppLovin MAX), in-app purchases, push notifications (OneSignal)

AI Tooling: Claude Code, custom skills and agent workflows, integrations with Jira, Slack, GitHub and Telegram

Tools: Git, GitHub, Visual Studio, Jira, Figma, adb/logcat

EXPERIENCE

Senior Unity Developer Mar 2025 – Present
Stratton Studios · Unity (C#) *Philippines*

Blockstone Island · Block puzzle game where each win helps restore an island Google Play

- Built limited-time live events end to end: progression maps, reward tracks, timers and leaderboards, tuned from remote config and robust to offline play and device clock changes.
- Built the player profile customization system: unlockable avatar frames and badges shown across the HUD and leaderboards, granted through one shared reward service.
- Built store, IAP offers, and reward screens from Figma designs; fixed sequencing bugs where popups and tutorials overlapped.
- Built an AI-assisted workflow for bugfixing in Claude Code across multiple custom skills that triage Jira tickets, draft and review first-pass fixes, and queue them for hand testing and approval.

Project under NDA · Simulated tabletop RPG with grid-based, turn-based play for an external client

- Served as technical coordinator and the client's sole point of contact, working directly with their designer and developer on requirements, feedback and technical decisions.
- Stepped in as interim producer, creating tasks, estimating their scope and duration, and handling integration.
- Developed grid-based gameplay systems, including building placement and editing, player movement, and UI.

Unity Integrator Feb 2024 – Mar 2025
DreamLords Digital · Unity (C#) *Philippines*

Project under NDA · Match-3 puzzle game *Web*

- Built 3D level environments from provided assets as backdrops for the puzzle elements.
- Resolved game-wide bug reports through debugging and fixes, working with several overseas teams.

Game Engineer Apr 2021 – Feb 2024
The Studio of Secret6 Inc. · Unity (C#), Cocos Creator (JavaScript/TypeScript) *Ortigas, Philippines*

Boggle Bash 2 · Competitive word game with power-ups, for EA/Pogo Pogo(Web)

- Developed the letter-grid input and word-forming logic, a basic battle pass, the audio system, and game UI.

Trivial Pursuit · Online trivia game for EA/Pogo Pogo(Web)

- Developed the audio system and built game UI from client feedback.

Cluedo · Puzzle and deduction game for EA/Pogo *Web*

- Implemented the audio system, game UI, and backend-to-frontend connections.

Hope Town Hero · Educational story game in Unity for Plan International Google Play

- Developed the onboarding and 2D in-game cutscene systems, and built game UI from client feedback.

INDIE PROJECTS

Katakata Creative · Unity (C#) *Oct 2020 – Present*

Kata · Story-driven adventure platformer centered around Filipino culture and arts Steam

- Implemented UI, audio triggers, platforming systems, and collectible objectives.
- Indie Winner, Cultural Center of the Philippines Pitch Deck Competition 2022; exhibited at PGDX 2023 and 2024.

Trash Teammates · Co-op endless climber about toys escaping a trash compactor Steam

- Contributed to bug fixing, game design and documentation as part of Katakata Creative.
- Worked on the floor spawning system so each new floor loads in correctly as players climb, and built several of the floors.
- 3rd Place, DOST Level Up Esports Game Dev Challenge 2024.

EDUCATION

Mapua Malayan Colleges Laguna 2015 – 2020
BS Information Technology (incomplete) *Laguna, Philippines*
